

SLCO Home Health Hazards-Green & Healthy Homes

News Release Date

02-03-2022

The Program's goal is to help families who have health conditions that are impacted by the home. The Program often targets several different issues that can be found in a home, including:

- Radon gas safety
- Presence of lead
- Trip and fall hazards
- Causes of asthma or any severe

respiratory problems

- Energy efficiency
- Retrofits to keep the elderly in their homes, so they can age in place

Follow the link below for more information on how you may qualify.

Mesothelioma is a rare cancer caused by inhaling or ingesting asbestos. If you have been exposed to asbestos, you can find information [here](#).
